

FARM TO SCHOOL IN EVERY COMMUNITY

Farm to school is a common sense approach to child nutrition that empowers children and their families to make informed food choices while strengthening the local economy and contributing to vibrant communities. Schools want to serve more local food and kids want to eat it. But outdated kitchen equipment, a need for staff training, and ways to connect with local farms are standing in their way. There's a bill to overcome these barriers, **An Act Establishing Farm to School Grants to Promote Healthy Eating and Strengthen the Agricultural Economy (S.301 & H.556)**.

Where are we now?

- 1/3 of Massachusetts K-12 students currently access local food or food education in school
- 110 farms sell to Massachusetts institutions
- Massachusetts schools spend over \$10 million annually on local foods

CORE ELEMENTS OF FARM to SCHOOL

Support “An Act Establishing Farm to School Grants to Promote Healthy Eating and Strengthen the Agricultural Economy” (S.301 & H.556)

BILL OVERVIEW

- Introduced by Representative Smitty Pignatelli and Senator Eric Lesser.
- Establishes a competitive grant program within the Department of Elementary and Secondary Education for eligible public schools serving over 490,000 students.
- Grants build the capacity of primary and secondary public schools to purchase ingredients grown and produced in Massachusetts, prepare scratch-cooked meals and educate students about the food system.
- Has cross-sector impact by updating infrastructure, providing job training, supporting local business growth, educating students, and improving public health.
- Grant funding is subject to appropriation, our goal for FY2021.

TAKE ACTION

The bills are currently in the Joint Committee on Education. Submit a letter of testimony to the committee co-chairs, Senator Lewis and Representative Peisch, asking them to vote the bills out favorably.

IMPACT OF FARM TO SCHOOL PROGRAMS

Farm to School is a win for students, farmers, fishermen, and communities.

ECONOMIC DEVELOPMENT

Farm to School keeps purchasing dollars local. Massachusetts schools spend approximately \$75 million on food annually. Let's invest that money in Massachusetts farmers, fishermen and food producers.

Every \$1 spent on direct farm purchases in MA, generates another \$1.12 in local economic activity.

110 Massachusetts farms sell to schools and 25% have grown their businesses to meet this demand.

HEALTH & NUTRITION

Farm to School programs increase student consumption of fruits and vegetables.

Farm to School can increase participation in school nutrition programs, so more kids, especially those coming from homes that are struggling to put food on their own tables, are eating nutritious meals, which help them grow and thrive at school.

25% of Massachusetts teens are overweight or obese and farm to school can help reverse that trend, saving on future health care costs.
