

# INTRO TO MUSHROOM GROWING

## (FOR EDUCATORS)

Join Paul Lagrèze of New England Wild Edibles for a hands-on workshop on mushroom cultivation, specifically designed for educators! Teachers will learn 3 different methods of growing mushrooms that can happen in the classroom and/or school garden: inoculating logs, growing on wood chips, and growing in bags. This workshop will also offer resources for teachers of all gardening experience levels, and suggestions for curricula to teach about fungi and its crucial role in our ecosystems.
